GENERAL INFORMATION

SuperSorb C may be used in the installation and production of trees, shrubs, foliage, bedding plants, containers, hanging baskets and flowerbeds. It increases the ability of the soil to hold water and reduces the frequency of irrigation. SuperSorb C may also be used to aid in the establishment of sod and turf seed. SuperSorb C may be injected into established turf using a variety of specialized equipment designed for that purpose. Follow the instructions of the equipment manufacturer.
