

"I use AquaGro L every time we fertilize. It provides many benefits. One of the biggest is that we have cut our watering by 25%, from 4 hours to 3 hours to water all our stock. This saves us money on labor, fertilizer and irrigation. And our plants look better, too!"

Water is at the foundation of everything you do to grow quality plants. AquaGro L used in every fertilizer application ensures that you are managing water as effectively as possible. This provides many cost saving benefits.

How To Get These Benefits

- Add AquaGro L to your water soluble fertilizer tank every time.
- Inject 10 ppm (1/8 ounce per 100 gallons) in every fertilizer application, **or**;
- Inject 100 ppm (1 1/4 ounces per 100 gallons) weekly, **or**;
- Inject 600 ppm (7 2/3 ounces per 100 gallons) every 4 weeks.

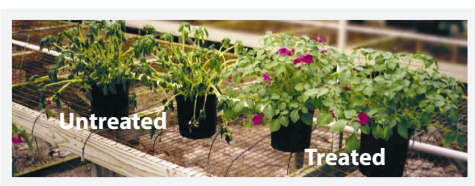

Don't waste labor and water fighting disasters! Helps retain moisture so plants don't dry out too quickly.

Don't let your profits go to waste! Keeps more water, fertilizer and drenched chemicals in the pot.

Get the most out of every dollar you spend! Increase plant productivity by more thoroughly using water, fertilizers and applied chemicals.

Increase profits by minimizing shrinkage! Improves shelf-life at retail so that more plants are sold.

Plant	Average Cost in Use – Total Production Cycle
1,000 4-inch pots	\$1.00 <i>less than 1/10 cent per pot!</i>
500 6-inch pots	\$1.00 <i>less than 1/5 cent per pot!</i>
