SECTION IV: FIRST AID MEASURES

4.1 Description of first aid measures

General advice: Show this SDS to the doctor in attendance. First responder needs to protect himself. Place affected apparel in a sealed bag for subsequent decontamination.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Consult a physician if necessary.

Skin contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention if irritation develops or persists. Wash contaminated clothing before re-use.

Eye contact: Flush eyes with water at least 15 minutes. Seek medical advice.

Ingestion: Do not induce vomiting without medical advice. Immediate medical attention is required. If victim is conscious, drink plenty of water and do not leave victim unattended. Vomiting may occur spontaneously. Seek medical advice.

4.2 Most important symptoms and effects, both acute and delayed.

Symptoms after inhalation: Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema or bronchitis.

Symptoms after skin contact: Skin contact may aggravate existing skin disease.

4.3 Indication of any immediate medical attention and special treatment needed

Note to physician: Treat symptomatically.

SECTION V: FIREFIGHTING MEASURES
5.1 Extinguishing media

Suitable extinguishing media:  Dry chemical, CO₂, foam, water spray.

Unsuitable extinguishing media:  High volume water jet

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting:  Under fire conditions, will burn.

Hazardous decomposition products:  Carbon oxides.

5.3 Advice for firefighters

Special protective equipment:  Firefighters should wear approved self-contained breathing apparatus and full protective clothing.

Further information:  Standard procedure for chemical fires. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

SECTION VI: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures.

Wear suitable protective equipment. For further information, see Section VIII “Exposure Controls/Personal Protection”.

6.2 Environmental precautions

Do not flush into surface water or sanitary sewer system. Take all necessary measures to avoid accidental discharge of products into drains and waterways due to the rupture of containers or transfer systems. Spills should be reported to local agencies.

6.3 Methods and materials for containment and cleanup

Methods of containment:  Stop leak if safe to do so.
   Dam up with sand or inert earth (do not use combustible materials).

Recovery:  Soak up with inert absorbent materials.
   Shovel or sweep up.
Keep in suitable, closed container for disposal.
Never return spills to original containers for re-use.

Decontamination/cleaning:
Clean contaminated surface thoroughly.
Wash non-recoverable remainder with large amounts of water.
Recover the cleaning water for subsequent disposal.
Decontaminate tools, equipment and personal protective equipment in a segregated area.

Disposal:
Dispose of in accordance with local regulations.

6.4 Reference to other sections
See Section VII for Handling and Storage.
