# DISPATCH<sup>®</sup>

SPRAYABLE

Dispatch<sup>®</sup> Sprayable is a patented soil surfactant and tank mix partner designed for cost-effective results with lower rates and more flexibility than other conventional soil surfactant programs. Dispatch<sup>®</sup> Sprayable can be used as a tank mix partner with products such as fertilizers, preemergence and other herbicides, insecticides and fungicides.

## General Use Guidelines

**INITIAL APPLICATION:** **IMPORTANT:** Begin applications at least one month prior to the onset of stress conditions. Under high stress situations, such as presence of localized dry spot (LDS), above average growing degree days (GDD), and/or low rainfall, an application of **Aqueduct<sup>®</sup>** should be applied 7 days prior to the first application of Dispatch Sprayable.

## Directions for Use

**WHAT IT DOES:** Dispatch Sprayable improves the infiltration and penetration of applied irrigation water and rainfall.

**WHERE TO USE:** Dispatch Sprayable is recommended for use on turfgrasses such as those found on golf courses, athletic fields, residential and commercial turf areas.

APPLICATION RATES AND FREQUENCY OPTIONS*:	Interval	Rate oz/A	Rate L/Ha	Variables which impact performance and program application can be: soil type, turf type, presence of LDS (localized dry spot), quality of irrigation water, growing degree days (GDD), and rainfall intervals.  *Recommendations assume <b>season long</b> program applications.
	2 weeks	16 oz	1.17L	
	3 weeks	24 oz	1.75L	
	4 weeks	32 oz	2.34L	

**Dispatch Sprayable does not need to be watered in following application. Irrigate before next mowing or leave baskets off.** Dispatch Sprayable is formulated to be applied by conventional spray rig equipment. For injection through irrigation systems, use **Dispatch Injectable**.

**TANK MIXING:** For improved delivery of some fertilizers and other chemical inputs, apply 16 ounces per acre (1.16 liters per hectare). Dispatch Sprayable is compatible with most turf chemicals. Prior to application, a jar test should be performed to evaluate the tank mix for compatibility and applied to a small area to determine the effect on turf quality.
