

SUPERIOR CONTROL OF ANNUAL BLUEGRASS WEEVIL

Avatar® PLX is a dry flowable mixture of two systemic insecticides for use on golf courses and sod farms and in the production and maintenance of horticultural crops on farms. Avatar® PLX has been shown to provide superior control of both larvae and adult Annual Bluegrass Weevil.

- ✓ Broad spectrum insect control
- ✓ Contains two systemic active ingredients
- ✓ Superior control of Annual Bluegrass Weevil (larvae & adults)
- ✓ Unique low odor formulation and packaging
- ✓ Controls mole crickets, Annual Bluegrass Weevil, cutworms, sod webworms, armyworms, fire ants, and more

Late Instar Application at Peak Density (5/9)

LATE INSTAR CONTROL

- Avatar® PLX is best utilized as a late instar application as larvae leave stem and feed on crown tissue
- Conducted on mixed bentgrass fairways in central PA
